

BluBØX's BluSKY and Person Reader Products Patent-Pending

BOSTON, MA- June 25, 2015 – BluBØX Technology Holding Inc., the technology holding company for BluBØX Security Inc. (www.blub0x.com), a leading provider of cloud based physical security solutions, announced today that its flagship platform BluSKY, a hosted web-cloud platform of unified BluBØX security applications, is now patent pending with the U.S. Patent and Trademark Office. This follows BluBØX's Multi-Factor Multi-Biometric physical access control device, The Person Reader, becoming patent pending in April 2015.

"We are excited to announce that BluBØX has been granted patent pending status for our two cornerstone products and will continue to take steps to protect the intellectual property in our products," said Patrick Barry, CEO of BluBØX Technology Inc. and BluBØX Security Inc. "I see these two new patent pending products as working hand in glove. BluSKY is a simple way for customers to migrate to the cloud and start reducing costs immediately while enjoying much more scalability and control of their systems. And the Person Reader finally puts high convenience and high security together in a single affordable device."

The recent BluSKY patent application covers innovative means to achieve real time monitoring and control of any hosted web-cloud physical access control system, with any device, anytime and from anywhere. Skip Cusack, CTO of BluBØX Security Inc. states, "The industry has not seen anything like this before. With this technology, all the hosted applications are tightly and fundamentally unified and work with the Mercury Open Hardware Platform. It is powerful in its simplicity and users can control and monitor any part of their system in real time from their mobile phone."

Pursuing patent protection of BluBØX's two premier products signals BluBØX's ongoing commitment to protecting their products and the technology innovations that underpin them. It also reflects BluBØX's highly unique and innovative approach to physical security. BluBØX will continue to take steps to protect its growing intellectual property portfolio and the rights of customers who use its derivative products and technology.

About [BluSKY](#)

Hosted. Mobile. Unified. Web.

A simple yet powerful web based hosted security software platform that unifies all major security applications and works with any browser on any device, anywhere, anytime. Nothing to install, easy to use and easy to support.

About [BluBOX Person Reader](#)

Natural. Fast. Accurate.

With the Person Reader you ARE the key. It is a fast and accurate way to grant you access through a portal without credentials. The Person Reader is a more secure and convenient replacement for card readers and cards and can be used anywhere you would use traditional access control. Use the Person Readers to complement card readers or replace them altogether. Person Readers are simple and natural to use. Just look and be recognized.

About [BluBOX](#)

BluBOX Security Inc. is a U.S. Manufacturer of Web-Cloud Based Physical Security Products and Services that delivers the unprecedented unification of Access, Alarms, Visitor, Video, and Biometrics. BluBOX has set a new standard, Security 4.0, which enables the most powerful, cost effective and scalable security solutions to be experienced in vivid simplicity on any mobile device, anytime and anywhere. BluBOX Technology Holding Inc. is responsible for the development, acquisition and protection of high barrier to entry intellectual property.
